Customize the designer experience

From now on, you can customize the designing experience of your HP WallArt Designer, by showing or hiding different steps through the following designer options.

How can I customize my Designer?

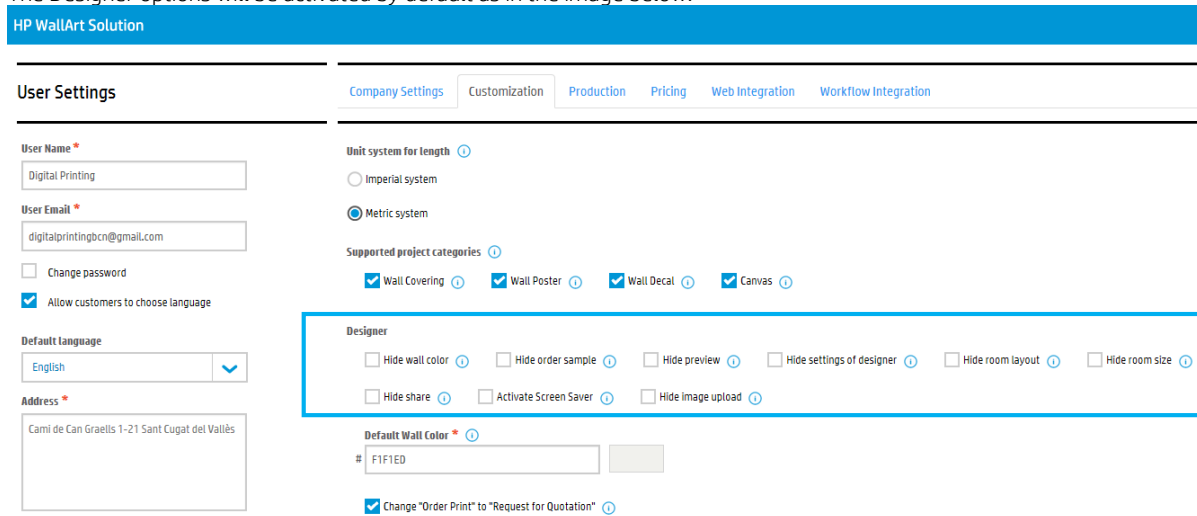

1. Click on the settings wheel

2. Go to Customization

The Designer options will be activated by default as in the image below:

In this case, the designer will not skip any of the steps that we currently follow:

May 2015

To configure the Designer avoiding the step/steps that you don't want to apply for your project **you will need to mark the check box to hide the option/options** as in the image.

3. Hide one step

Example: we want to hide the **'room layout'** remembering to update the settings after the selection in the **Update settings box**.

May 2015

Workflow integration new options

It's already available the **JDF Connection** with **ONYX** rip. You will find the new ONYX tutorial through the following link:

Besides, the workflow integration option: **Settings > Workflow integration a new option**, allows you to connect your WallArt account with another Print Service Provider in case of outsourcing needs.

You will need to enable the check box: **Enable redirection** and choose if you want to redirect all orders or specific orders.
